## Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The most relevant prior art of the record to this instant invention is Crooks (US 4572915). Crooks teaches or suggests clear, micellized aqueous formulations comprising fat soluble vitamins (i.e., d-alpha-tocopherol, alpha-tocopherol, retinal (vitamin A), vitamin D), essential nutrients (i.e., ethyl linoleate), herb oils, other fat soluble pharmaceutical agent (i.e., beta-carotene) and the water misible polyol (i.e., glycerol) and polyethoxylated castor oil that are to be ingested by humans as nutrional and/or vitamin supplements. However, Crooks is silent about the claimed method in treating oral leukoplakia lesion.

In the examiner opinion, there is no motivation either suggested or taught from the prior art to select Crook's formulation to treat leukopenia in human patients.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Kwon whose telephone number is (703) 308-5377. The examiner can normally be reached Tuesday through Friday from 9:00 am to 7:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marianne Seidel, can be reached on (703) 308-4725. The fax number for this Group is (703) 308-4556.
